Dear Mr. Perez,

Re: US Patent application # 09/701,861

Thank you for taking my phone call on the 16/8/04 with regards to the above patent application. To refresh your memory I mentioned that I had received a European patent based on the reader containing the means within itself to interpret data from a data carrier to select a communication program.

Please find the attached amended claims 1 to 13 that replace all prior claims submitted for this application.

I do apologise for being presumptuous in requesting your urgent attention, however after 6 years of trying to get some interest in this invention I may now have an interested party.

I look forward to your response.

Thank you again for your attention to this matter.

Yours Sincerely

Robert Kaplan
